

Position Description & Requirements

Position/Title: Healthcare Data Analyst, Manager

Department: Corus

Required Time Commitment (Full Time/Part Time): Full Time, eligible for paid time off (PTO), 401K benefits, and medical benefits.

Job Description: Immediate opening under our Corus Advantage MSO, This job creates data-driven insights which identify actionable opportunities and/or create analytics and reporting solutions: lower health care costs, improve outcomes from and quality of care received, and optimal member/patient and provider experiences with care delivery. Serves as a subject matter and technical expert for internal and external customers, leveraging advanced analytical expertise and experience to aggregate, analyze and understand patterns in varied and complex data; and articulates analytic findings, business implications, and recommendations to realize identified opportunities

Essential Responsibilities/Job Functions: **NOTE: The list of tasks is illustrative only and is not a comprehensive list of all functions and tasks performed by this position.*

- Leads the design, development, execution, dissemination, and interpretation of clinical and population health analyses, metrics, and reports using clinical, member, financial and administrative data to identify, develop and/or monitor actionable opportunities for improving health and healthcare outcomes and clinical quality and costs of care, efficiently and effectively managing projects to successful completion.
- Interpret and analyze data from multiple sources including claims, provider, member, and encounters data. Identify and assess the business impact of trends.
- Produce and manage KPI reports for value-based agreements.
- Monitor cost and revenue trends for healthcare providers and identify underlying drivers of developing trends.
- Establishes strong, collaborative, and effective relationships and communication with internal and external clinical, administrative, operational, financial, and technical stakeholders to ensure analytics are actionable and aligned with organizational strategic priorities, needs, plans, and resources.
- Serves as a strategic business partner to internal and external stakeholders as demonstrated by providing thought leadership and subject matter expertise, and by anticipating and actively proposing, designing, and executing analyses.
- Provides consultative, technical, subject matter, and business expertise mentorship to colleagues across the enterprise.
- Other duties as assigned or requested

EDUCATION REQUIRED:

- Bachelor's degree in business, economics, statistics, mathematics, actuarial science, public health, health informatics, healthcare administration, finance, or related field or equivalent experience.

EXPERIENCE REQUIRED:

- 2+ years of leading the design, execution, and dissemination of clinical and population health reporting, analyses, and studies of progressive scope and complexity.
- 2+ years with analytical software, systems, tools, and processes using claims, clinical, enrollment, and provider data.
- 2+ years of project leadership in a complex, matrixed environment (payer and/or provider preferred).
- 2+ years of providing healthcare analytical consultation to clinical, administrative, operational, and financial stakeholders.
